Harbor Point Water Authority 2025 Operations Report

1. Overview

The Harbor Point Water Authority served 212,000 residents across the municipalities of Alder Bay, Kestrel Falls and Morrow Junction during 2025. The authority was established in 1968. Dana Whitlock served as Chief Operating Officer for the reporting year.

This report summarises treatment, distribution and financial performance. Figures are unaudited unless stated otherwise.

2. Treatment

The Eastgate Treatment Plant has a rated capacity of 96 million liters per day. Average daily production in 2025 was 71.4 million liters.

In March 2025 the plant switched its coagulant from aluminium sulfate to polyaluminium chloride, which reduced sludge volume by 12 percent.

3. Distribution

The distribution network comprises 1,140 km of water mains. Non-revenue water, the share of treated water that is lost or unbilled, was 17.8 percent. Crews replaced 23 km of cast-iron mains and responded to 186 main breaks.

4. Finance and outlook

The operating budget for 2025 was 48.2 million dollars. The largest 2026 capital project is the Northshore reservoir liner replacement, estimated at 9.6 million dollars. A rate increase of 3.5 percent takes effect on July 1, 2026.
